Some remarks on weak continuity. (English) [Zbl 0764.54007](#)

Am. Math. Mon. 98, No. 10, 931-934 (1991).

The authors consider weakened concepts of continuity as weak continuity of *N. Levine* [*ibid.* 68, 44-46 (1961; [Zbl 0100.186](#))] and closure continuity of *D. R. Andrew* and *E. K. Whittley* [*ibid.* 73, 758- 759 (1966; [Zbl 0145.194](#))] and investigate some of their properties and relations to continuity.
