

Caussinus, Henri; Ferré, Louis

Comparing the parameters of a model for several units by means of principal component analysis. (English) [Zbl 0800.62311](#)

Comput. Stat. Data Anal. 13, No. 3, 269-280 (1992).

MSC:

62H25 Factor analysis and principal components; correspondence analysis
62-09 Graphical methods in statistics (MSC2010)

Cited in **6** Documents

Keywords:

principal component analysis; parametric modelling; graphical displays; growth curves; dispersion matrices

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
