

Jetto, L.; Longhi, S.; Papini, A.

Adaptive dead-beat control law for trajectory tracking of robotic manipulators. (English)

Zbl 0825.93353

Int. J. Adapt. Control Signal Process. 8, No. 6, 587-604 (1994).

MSC:

- 93C40 Adaptive control/observation systems
- 93C85 Automated systems (robots, etc.) in control theory
- 93E10 Estimation and detection in stochastic control theory
- 93C55 Discrete-time control/observation systems

Keywords:

time-dependent

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
