

El Soufi, Ahmad; Jeune, Albert

Morse index of p -harmonic maps. (Indice de Morse des applications p -harmoniques.) (French)

Zbl 0853.58037

Ann. Inst. Henri Poincaré, Anal. Non Linéaire 13, No. 2, 229-250 (1996).

Authors' abstract: "We investigate estimates and calculation of the Morse index of p -harmonic maps, with $p \in]2, +\infty[$. More particularly, we deal with the identity map and maps from or to spheres. Our results extend those obtained for harmonic maps ($p = 2$).

Full details are provided".

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
