

Oloff, Rainer

Interpolation zwischen den Klassen \mathfrak{S}_p von Operatoren in Hilberträumen. (German)

Zbl 0181.13504

Math. Nachr. 46, 209-218 (1970).

For a scan of this review see the [web version](#).

MSC:

46M35 Abstract interpolation of topological vector spaces

47B07 Linear operators defined by compactness properties

47B10 Linear operators belonging to operator ideals (nuclear, p -summing, in the Schatten-von Neumann classes, etc.)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
