Fichera, Gaetano; De Vito, Luciano

Analytic functions of a complex variable. (Funzioni analitiche di una variabile complessa.).

3 ed. (Italian) [Zbl 0226.30001]

For a scan of this review see the web version.

MSC:

- 30-01 Introductory exposition (textbooks, tutorial papers, etc.) pertaining to functions of a complex variable
- 30Dxx Entire and meromorphic functions of one complex variable, and related topics
- 30Axx General properties of functions of one complex variable
- 31A05 Harmonic, subharmonic, superharmonic functions in two dimensions
- 31B05 Harmonic, subharmonic, superharmonic functions in higher dimensions
- 30Fxx Riemann surfaces
- 41A50 Best approximation, Chebyshev systems
- 41A58 Series expansions (e.g., Taylor, Lidstone series, but not Fourier series)
- 30Cxx Geometric function theory
- 46C05 Hilbert and pre-Hilbert spaces: geometry and topology (including spaces with semidefinite inner product)
