

Retherford, J. R.

Operator characterizations of L_p -spaces. Proc. internat. Sympos. partial diff. Equ. Geometry normed lin. Spaces II. (English) [Zbl 0253.46059](#)

Isr. J. Math. 13, 337-347 (1972).

For a scan of this review see the [web version](#).

MSC:

- [46E30](#) Spaces of measurable functions (L^p -spaces, Orlicz spaces, Köthe function spaces, Lorentz spaces, rearrangement invariant spaces, ideal spaces, etc.)
- [47D99](#) Groups and semigroups of linear operators, their generalizations and applications
- [47B10](#) Linear operators belonging to operator ideals (nuclear, p -summing, in the Schatten-von Neumann classes, etc.)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
