

Godich, V. I.

Multiplicative representations of some bisymmetric matrix functions. (English)

Zbl 0312.15003

Ukr. Math. J. 26(1974), 138-145 (1975).

For a scan of this review see the [web version](#).

MSC:

15A15 Determinants, permanents, traces, other special matrix functions

15A21 Canonical forms, reductions, classification

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
