

Kawai, Takahiro

Construction of elementary solutions for I-hyperbolic operators and solutions with small singularities. (English) [Zbl 0216.12301](#)

Proc. Japan Acad. 46, 912-916 (1970).

MSC:

- [35A27](#) Microlocal methods and methods of sheaf theory and homological algebra applied to PDEs
- [35A20](#) Analyticity in context of PDEs
- [65H10](#) Numerical computation of solutions to systems of equations
- [47F05](#) General theory of partial differential operators (should also be assigned at least one other classification number in Section 47-XX)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
