

**Pour-El, Marian Boykan; Putnam, Hilary**

**Recursively enumerable classes and their application to recursive sequences of formal theories.** (English) [Zbl 0242.02046](#)

Arch. Math. Logik Grundlagenforsch. 8, 104-121 (1965).

For a scan of this review see the [web version](#).

**MSC:**

[03D60](#) Computability and recursion theory on ordinals, admissible sets, etc.

[03D25](#) Recursively (computably) enumerable sets and degrees

Cited in **7** Documents

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
