

**Fourneau, Rene**

**Lattis de fermes convexes.** (French) Zbl 0251.06015  
Bull. Soc. R. Sci. Liège 41, 468-483 (1972).

For a scan of this review see the [web version](#).

**MSC:**

- [06B05](#) Structure theory of lattices
- [46A03](#) General theory of locally convex spaces
- [52A05](#) Convex sets without dimension restrictions (aspects of convex geometry)
- [46A19](#) Other “topological” linear spaces (convergence spaces, ranked spaces, spaces with a metric taking values in an ordered structure more general than  $\mathbb{R}$ , etc.)
