

McLaughlin, T. G.

Complete index sets of recursively enumerable families. (English) Zbl 0306.02040
Compos. Math. 24, 83-91 (1972).

For a scan of this review see the [web version](#).

MSC:

03D55 Hierarchies of computability and definability
03D25 Recursively (computably) enumerable sets and degrees
03D30 Other degrees and reducibilities in computability and recursion theory

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
