

Banks, H. T.; Manitius, Andrzej

Projection series for retarded functional differential equations with applications to optimal control problems. (English) [Zbl 0331.34059](#)

J. Differ. Equations 18, 296-332 (1975).

For a scan of this review see the [web version](#).

MSC:

- [34K05](#) General theory of functional-differential equations
- [34A45](#) Theoretical approximation of solutions to ordinary differential equations
- [49K99](#) Optimality conditions
- [49M15](#) Newton-type methods

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
