

Seneta, E.

Non-negative matrices and Markov chains. 2nd ed. (English) Zbl 0471.60001

Springer Series in Statistics. New York - Heidelberg - Berlin: Springer-Verlag. XV, 279 p. DM 69.90; \$ 32.60 (1981).

For a scan of this review see the [web version](#).

MSC:

- 60-01 Introductory exposition (textbooks, tutorial papers, etc.) pertaining to probability theory
- 15-01 Introductory exposition (textbooks, tutorial papers, etc.) pertaining to linear algebra
- 60J10 Markov chains (discrete-time Markov processes on discrete state spaces)
- 15A15 Determinants, permanents, traces, other special matrix functions
- 15A18 Eigenvalues, singular values, and eigenvectors
- 15B48 Positive matrices and their generalizations; cones of matrices
- 15B51 Stochastic matrices
