

Bhatia, Rajendra; Holbrook, John A. R.

On the Clarkson-McCarthy inequalities. (English) Zbl 0618.47008
Math. Ann. 281, No. 1, 7-12 (1988).

Some famous inequalities of McCarthy for Schatten p -norms of Hilbert space operators are interpreted in such a way that a much easier proof and an extension to a wider class of norms become possible.

MSC:

47A30 Norms (inequalities, more than one norm, etc.) of linear operators
47B10 Linear operators belonging to operator ideals (nuclear, p -summing, in the Schatten-von Neumann classes, etc.)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
