

Vlasov, A. A.

Mass of Newtonian stars in the relativistic theory of gravitation and in general relativity.
(English. Russian original) [Zbl 0653.53054](#)

Theor. Math. Phys. 73, No. 1, 1124-1129 (1987); translation from *Teor. Mat. Fiz.* 73, No. 1, 154-160 (1987).

See the review in [Zbl 0629.53067](#).

MSC:

53B50 Applications of local differential geometry to the sciences

83D05 Relativistic gravitational theories other than Einstein's, including asymmetric field theories

Keywords:

[mass of a star](#); [relativistic theory of gravitation](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
