MSC:

35P20 Asymptotic distributions of eigenvalues in context of PDEs
47F05 General theory of partial differential operators

Cited in **22** Documents

Keywords:

asymptotic behavior of the spectrum; survey; asymptotics of the discrete spectrum; self-adjoint differential operators

Full Text: [DOI](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
