Francez, Nissim; Hoare, C. A. R.; Lehmann, Daniel J.; de Roever, Willem P.
Semantics of nondeterminism, concurrency, and communication. (English) Zbl 0434.68066

For a scan of this review see the web version.

MSC:
68Q55 Semantics in the theory of computing
68N01 General topics in the theory of software
68Q60 Specification and verification (program logics, model checking, etc.)

Keywords:
concurrent programming; domain equation; fixed points; binding termination; denotational semantics for a high level language for distributed programming

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
