

Cote, Gilles; Laughton, M. A.

Stochastic production costing in generation planning: A large-scale mixed integer model.

(English) [Zbl 0488.90034](#)

Math. Program. Study 20, 54-71 (1982).

For a scan of this review see the [web version](#).

MSC:

[90B30](#) Production models

[90C90](#) Applications of mathematical programming

[90C11](#) Mixed integer programming

Keywords:

large-scale mixed integer model; generation planning; Benders' partitioning method; forced outages of power plants; decomposition; stochastic production costing algorithm

Software:

[WASP](#)
