

Groemer, H.

Extremal convex sets. (English) Zbl 0513.52003
Monatsh. Math. 96, 29-39 (1983).

For a scan of this review see the [web version](#).

MSC:

52A20 Convex sets in n dimensions (including convex hypersurfaces)

52A40 Inequalities and extremum problems involving convexity in convex geometry

52C17 Packing and covering in n dimensions (aspects of discrete geometry)

Cited in **1** Review
Cited in **8** Documents

Keywords:

extremal convex sets; real valued function on the class of closed convex subsets of Euclidean n -dimensional space; circumradius; inradius; maximal; minimal

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
