Extremal contractions of three-dimensional algebraic varieties. (Russian) Zbl 0604.14025
Sb. Nauchn. Tr., Yarosl. Gos. Pedagog. Inst. Im. K. D. Ushinskogo 203, 74-90 (1983).

This paper is a continuation of investigations of Mori and Kawamata concerning the description of morphisms associated with extremal rays and can be applied to the birational classification of three-dimensional algebraic varieties.
