Different types of products and subdirectly irreducible graphs. (English) Zbl 0614.05051
Acta Univ. Carol., Math. Phys. 27, No. 2, 23-30 (1986).

Subdirect irreducibility of undirected graphs without loops and multiple edges is studied for three types of products-categorical, Cartesian and mixed ones. For categorial and mixed products full characterizations of subdirectly irreducible graphs are given.
