**Seismic performance of high strength reinforced concrete buildings evaluated by nonlinear pushover and dynamic analyses.** (English) [Zbl 1359.74273](#)

Int. J. Struct. Stab. Dyn. 16, No. 3, Article ID 1450107, 27 p. (2016).

**MSC:**

74K20 Plates

**Keywords:**

high-strength concrete; high strength steel; plastic hinge; pushover analysis; nonlinear dynamic analysis

**Software:**

SeismoStruct

**Full Text:** [DOI](#)

**References:**

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
