

Serafini, Paolo; Ukovich, Walter

A mathematical model for periodic scheduling problems. (English) Zbl 0676.90030

SIAM J. Discrete Math. 2, No. 4, 550-581 (1989).

MSC:

90B35 Deterministic scheduling theory in operations research

90C35 Programming involving graphs or networks

68Q25 Analysis of algorithms and problem complexity

90B10 Deterministic network models in operations research

Cited in **55** Documents

Keywords:

cyclic scheduling; activities of periodic type; periodic events; time constraints; NP-complete; implicit enumeration; average complexity

Software:

PESPLib
