Hernández, Julio C.; Hofmann, Karl H.
A note on locally compact subsemigroups of compact groups. (English) Zbl 07365265
Semigroup Forum 103, No. 1, 291-294 (2021)

Summary: An elementary proof is given for the fact that every locally compact subsemigroup of a compact
topological group is a closed subgroup. A sample consequence is that every commutative cancellative
pseudocompact locally compact Hausdorff topological semigroup with open shifts is a compact topological
group.
