Tikhomirov, V. M.
Leonid Kantorovich and approximation theory. (English. Russian original) [Zbl 07466395]

The many contributions of Leonid Kantorovich (1912–1986) have had a great impact on the development of approximation theory and functional analysis worldwide. The present work gives a survey on some of his seminal results in approximation theory some of which rest on results achieved by Chebyshev in the 19th century.
