

Hashin, Zvi

Extremum principles for elastic heterogeneous media with imperfect interfaces and their application to bounding of effective moduli. (English) [Zbl 0760.73077](#)

J. Mech. Phys. Solids 40, No. 4, 767-781 (1992).

MSC:

74S30 Other numerical methods in solid mechanics (MSC2010)

74P10 Optimization of other properties in solid mechanics

74B99 Elastic materials

Cited in **1** Review
Cited in **27** Documents

Keywords:

extremum principles of minimum potential and minimum complementary energies; two-phase materials; polycrystalline aggregates

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
