

Solutions for nonlinear elliptic equations. Proceedings of a symposium held at the Research Institute for Mathematical Sciences, Kyoto University, Kyoto, Japan, July 12-15, 1988.

(Japanese, English) [Zbl 0782.35015](#)

RIMS Kôkyûroku. 679. Kyoto: Kyoto University, Research Institute for Mathematical Sciences, ii, 274 p. (1989).

[The articles of this volume will not be indexed individually.]

Contents: *Wei-Ming Ni*, Recent progress in semilinear elliptic equations (pp. 1-39); *Kazuya Hayasida*, Recent development in quasilinear elliptic boundary value problems (Japanese) (pp. 40-57); *Takaši Kusano*, Entire solutions for semilinear elliptic equations (Japanese) (pp. 58-68); *Hiraku Nakajima*, Harmonic maps in 2 and 3 dimensions (Japanese) (pp. 69-79); *Takashi Suzuki*, Semilinear equations with exponential nonlinearity (pp. 80-105); *Kuo-Shung Cheng* [*Kuo Shun Chêng*] and *Joel Smoller*, Prescribing Gaussian curvature on S^2 (pp. 106-116); *Kazuhiro Horihata*, On higher differentiability and partial regularity of the minimizers in the calculus of variations (pp. 117-126); *Tatsuo Itoh*, Blow-up of solutions for semilinear parabolic equations (pp. 127-139); *Shuichi Jimbo*, Perturbed solutions of semilinear equations in the singularly perturbed domain (pp. 140-153); *Ryoichi Kobayashi*, On Ricci-flat complete Kähler metrics on affine algebraic manifolds (Japanese) (pp. 154-162); *Shigeaki Koike*, On the rate of convergence in singular perturbations of obstacle problems (pp. 163-173); *Kazuhiro Kurata*, On some elliptic equations with nonlocal nonlinear terms (pp. 174-182); *Song-Sun Lin*, On non-radially symmetric bifurcation in the annulus (pp. 183-193); *Hideo Nagai*, Asymptotic behavior of the Bellman equation (Japanese) (pp. 194-201); *Shizuo Nakane*, Local profile of mild solutions in 2D symmetric domains (Japanese) (pp. 202-209); *Mitsuharu Ôtani*, Eigenvalue problems for some quasilinear equations (pp. 210-218); *Shigeru Sakaguchi*, Uniqueness of critical point of solutions (pp. 219-231); *T. Sasaki*, On the projectively minimal hypersurfaces (Japanese) (pp. 232-239); *Shôichirô Takakuwa*, A convergence theorem for harmonic maps (Japanese) (pp. 240-249); *Hwai-chiuan Wang* [*Huai Ch'üan Wang*], Solutions of some semilinear elliptic problems (pp. 250-260); *Shoji Yotsutani*, A generalized Pokhozhaev identity and its applications (pp. 261-274).
