

Mao, K. M.; Sun, C. T.

A refined global-local finite element analysis method. (English) Zbl 0825.73818
Int. J. Numer. Methods Eng. 32, No. 1, 29-43 (1991).

MSC:

74S05 Finite element methods applied to problems in solid mechanics
65N30 Finite element, Rayleigh-Ritz and Galerkin methods for boundary value problems involving PDEs

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
