

Klein, Felix

The Erlangen program. Comparing considerations concerning new geometric research. 2. Aufl. (Das Erlanger Programm. Vergleichende Betrachtungen über neuere geometrische Forschungen.) (German) [Zbl 0833.01037](#)

Ostwalds Klassiker der exakten Wissenschaften. 253. Frankfurt am Main: Verlag Harri Deutsch. 84 S. (1995).

This is a useful, but mere reprint of the edition which appeared in 1974; ([Zbl 0288.50012](#)). It comprehends a preface, a biographical note on Felix Klein and an article 'Zur Entstehungsgeschichte des Erlanger Programms', Mitt. Math. Ges. DDR Heft 1, 23-40 (1968; [Zbl 0165.00501](#)) by *H. Wußing* F. Klein's famous Comparing considerations concerning new geometric researches. The newer research literature about this topic is not taken into account.
