

De Giorgi, Ennio

Conjectures on limits of solutions of some quasilinear parabolic equations. (Italian)

[Zbl 0840.35012](#)

Ambrosetti, A. (ed.) et al., Nonlinear analysis. A tribute in honour of Giovanni Prodi. Pisa: Scuola Normale Superiore, Quaderni. Università di Pisa. 173-187 (1991).

The author gives several conjectures on the rapports between the limits of quasilinear parabolic equations, mean curvature flows, parabolic harmonic maps and many other problems in Analysis, Calculus of Variations, Geometry and Mathematical Physics.

For the entire collection see [[Zbl 0830.00011](#)].
