Int. J. Approx. Reasoning 18, No. 3-4, 239-249 (1998).

Summary: In knowledge representation, when we have to use logical connectives, various continuous  $t$ -norms and  $t$ -conorms are used. In this paper, we show that every continuous  $t$ -norm and  $t$ -conorm can be approximated, to an arbitrary degree of accuracy, by a strict Archimedean  $t$ -norm ( $t$ -conorm).
