Toft, Bjarne
Claude Berge – sculptor of graph theory. (English) [Zbl 1106.01322]

From the text: Claude Berge fashioned graph theory into an integrated and significant part of modern mathematics. As was clear to all who met him, he was a multifaceted person, whose achievements, however varied they might seem at first glance, were interconnected in many ways.

My purpose here is to present an account of some of Claude Berge’s activities and achievements, mainly with regard to his role as a graph theorist.

For the entire collection see [Zbl 1098.05001].
