Huang, Haiwu; Wu, Qunying; Wang, Yao
A weak law of large number for pairwise NQD random sequences. (Chinese. English summary)
Zbl 1141.60314

Summary: This paper makes a study of the convergence properties of widely used pairwise NQD random sequences, some weak laws of large number in the pairwise independence case are acquired, and some results for identically distributed NQD random sequences are obtained.

MSC:
60F05 Central limit and other weak theorems

Keywords:
pairwise NQD sequences; weak law of large number
