

Nayak, Prasun Kumar; Pal, Madhumangal

Linear programming technique to solve two person matrix games with interval pay-offs.

(English) [Zbl 1168.91306](#)

Asia-Pac. J. Oper. Res. 26, No. 2, 285-305 (2009).

MSC:

91A05 2-person games

90C05 Linear programming

Cited in **1** Review
Cited in **10** Documents

Keywords:

Fuzzy number; interval numbers; interval game; saddle point

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
