**The growth of double Dirichlet series.** (Chinese. English summary) Zbl 1212.30006

*Acta Math. Sci., Ser. A, Chin. Ed.* 29, No. 4, 958-968 (2009).

Summary: The authors first study the relations among the coefficients, exponents, and growth of double Dirichlet series, and obtain a necessary and sufficient condition of  $\theta$  linear lower order, and further give an estimate of  $\theta$  linear order of double Dirichlet series in every pair of horizontal straight lines.

**MSC:**

**30B50** Dirichlet series, exponential series and other series in one complex variable
