

Langer, Miroslav

On hierarchy of the positioned eco-grammar systems. (English) Zbl 1323.68331
Kybernetika 50, No. 5, 696-705 (2014).

Summary: Positioned eco-grammar systems (PEG systems, for short) were introduced in our previous papers. In this paper we engage in a new field of research, the hierarchy of PEG systems, namely in the hierarchy of the PEG systems according to the number of agents presented in the environment and according to the number of types of agents in the system.

MSC:

[68Q42](#) Grammars and rewriting systems

Keywords:
