

Duong, Ngo Quang; Tung, Vu Thanh

A generalization of Droz-Farny's line theorem with orthologic triangles. (English)

Zbl 1362.51006

Forum Geom. 16, 415-418 (2016).

Summary: We prove a generalization of Droz-Farny's theorem with orthologic triangles.

MSC:

51M04 Elementary problems in Euclidean geometries

Keywords:

Droz-Farny's line theorem; orthologic triangles

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
