

Ozeki, Kenta; Zamfirescu, Carol T.

Every 4-connected graph with crossing number 2 is Hamiltonian. (English) Zbl 1401.05175
SIAM J. Discrete Math. 32, No. 4, 2783-2794 (2018).

MSC:

05C45 Eulerian and Hamiltonian graphs
05C10 Planar graphs; geometric and topological aspects of graph theory
05C38 Paths and cycles

Cited in 1 Document

Keywords:

Hamiltonian cycle; crossing number; 3-cuts

Full Text: [DOI](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
