Publisher’s description: This second volume in a two-volume series provides an extensive collection of conjectures and open problems in graph theory. It is designed for both graduate students and established researchers in discrete mathematics who are searching for research ideas and references. Each chapter provides more than a simple collection of results on a particular topic; it captures the reader’s interest with techniques that worked and failed in attempting to solve particular conjectures. The history and origins of specific conjectures and the methods of researching them are also included throughout this volume. Students and researchers can discover how the conjectures have evolved and the various approaches that have been used in an attempt to solve them. An annotated glossary of nearly 300 graph theory parameters, 70 conjectures, and over 600 references is also included in this volume. This glossary provides an understanding of parameters beyond their definitions and enables readers to discover new ideas and new definitions in graph theory.

The editors were inspired to create this series of volumes by the popular and well-attended special sessions entitled “My Favorite Graph Theory Conjectures,” which they organized at past AMS meetings. These sessions were held at the winter AMS/MAA Joint Meeting in Boston, January 2012, the SIAM Conference on Discrete Mathematics in Halifax in June 2012, as well as the winter AMS/MAA Joint Meeting in Baltimore in January 2014, at which many of the best-known graph theorists spoke. In an effort to aid in the creation and dissemination of conjectures and open problems, which is crucial to the growth and development of this field, the editors invited these speakers, as well as other experts in graph theory, to contribute to this series.

The articles of this volume will be reviewed individually. For Volume 1 see [Zbl 1357.05001]. Indexed articles:

- Beineke, Lowell W., Desert island conjectures, 7-18 [Zbl 1414.05203]
- Goddard, Wayne, Binding number, cycles, and cliques, 19-25 [Zbl 1418.05102]
- Jacobs, David P.; Trevisan, Vilmar, A conjecture on Laplacian eigenvalues of trees, 27-42 [Zbl 1414.05179]
- Weakley, William D., Queens around the world in twenty-five years, 43-54 [Zbl 1414.05234]
- Graham, Ron, Reflections on a theme of Ulam, 55-61 [Zbl 1414.05200]
- Hedetniemi, Stephen T., Ulam numbers of graphs, 63-68 [Zbl 1414.05201]
- Sumner, David, Forbidden trees, 69-89 [Zbl 1414.05081]
- Oellermann, Ortrud R., Some of my favourite conjectures: local conditions implying global cycle properties, 91-100 [Zbl 1414.05177]
- Chvátal, Vášek, Correction to: “A de Bruijn-Erdős theorem in graphs?”, C1-C2 [Zbl 1414.05281]
- Frick, Marietjie; Dunbar, Jean E., The path partition conjecture, 101-113 [Zbl 1414.05163]
- Gethner, Ellen, To the Moon and beyond, 115-133 [Zbl 1418.05003]
- Henning, Michael A., My favorite domination game conjectures, 135-148 [Zbl 1414.05195]
- Chvátal, Vášek, A de Bruijn-Erdős theorem in graphs?, 149-176 [Zbl 1414.05282]

MSC:
- 05-06 Proceedings, conferences, collections, etc. pertaining to combinatorics
- 05Cx2 Graph theory
- 00A07 Problem books
- 00B15 Collections of articles of miscellaneous specific interest
