Efficient maintenance and self-collision testing for kinematic chains. (English) Zbl 1414.68132

MSC:
68U05 Computer graphics; computational geometry (digital and algorithmic aspects)
68T40 Artificial intelligence for robotics
70B15 Kinematics of mechanisms and robots
92C40 Biochemistry, molecular biology

Keywords:
bounding-volume hierarchy; collision detection; modelling kinematic chains; molecular modelling; self-collisions
