On the mean distribution of F. Smarandache function.  (Chinese. English summary)

Zbl 1424.11068

Summary: The main purpose of this paper is using the elementary and analytic method to study the mean value of the F. Smarandache multiplicative function in the sequence of simple numbers, and give some asymptotic formulae of F. Smarandache function. Thus enriched and developed the research work of number theory.

MSC:
11B83  Special sequences and polynomials

Keywords:
F. Smarandache multiplicative function; sequence of simple numbers; mean value; asymptotic formula
