Goujard, Elise; Möller, Martin

Counting Feynman-like graphs: quasimodularity and Siegel-Veech weight. (English)

MSC:
05C30 Enumeration in graph theory
05A15 Exact enumeration problems, generating functions
11F11 Holomorphic modular forms of integral weight
32G15 Moduli of Riemann surfaces, Teichmüller theory (complex-analytic aspects in several variables)
14H30 Coverings of curves, fundamental group

Keywords: quasimodular forms; Feynman graphs; Siegel-Veech constants; tropical covers; correspondence theorem

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
